Motivated and currently focusing on becoming Frontend Developer with foundational skills in React.js, HTML, CSS, and JavaScript focused on creating and building clean and responsive web interfaces. I am eager to apply my knowledge in a professional environment, gain practical experience and continue improving my technical and problem-solving skills and understanding. I am also aspiring to become a Full Stack Developer, currently learning MERN stack and modern web development practices.

SKILLS**Language and frameworks:** Javascript, Tailwind CSS, React, Node.js, Express.js**Databases:** MongoDB, MySQL**Tools and platforms:** Git, GitHub, Vercel, REST APIs**Soft skills:** Good communication, Team work, Adaptability, Problem solving**PROJECTS****WorkConnect:** [GitHub](#)

A MERN stack web application where users can post/apply for a local job based on the users role. A user who posts a can also view who and how many applied for the job and a user can apply to multiple jobs of their skills, interests and experience.

Tech stack

Frontend: Reactjs, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, Mongoose

Authentication: JWT, OAuth, bcrypt

PORTFOLIO:

A Reactjs based portfolio website about myself. It consists of sections like About, Contact, Projects, Skills. This website gives information about myself, projects I worked on and skill I have or I am learning.

Tech stack

Frontend: Reactjs, Tailwind CSS

Movie Recommendation: [GitHub](#)

A movie recommendation frontend only application which recommends movies to user and user can also search for movie. This application uses TMDB APIs for recommending movies.

Tech stack

Frontend: Reactjs, Tailwind CSS, TMDB APIs
